LinkedIn | GitHub | Portfolio

Education

Sir Padampat Singhanian University

B.Tech in Computer Science and Engineering CGPA: 8.5/10

2023 – 2027

Udaipur, Rajasthan

KLN Junior College

Class XII (Intermediate) 98%

2021 – 2023

Miryalaguda, Telangana

Experience

Full Stack Developer Intern

Sep 2025 – Nov 2025

Infosys Springboard

Virtual

- Developed a MEAN Stack CRUD application with Login and Signup authentication.
- Implemented CRUD operations, notifications, and database integration using MongoDB.
- Built a Kanban Task Manager for efficient task management.

Full Stack Developer Intern

Jun 2026 – Jul 2026

Xebia

Virtual

- Developed a Learning Management System (LMS) portal using frontend and backend technologies.
- Designed responsive user interfaces and integrated backend APIs with the database.
- Collaborated with mentors to build scalable and user-friendly web application features.

Projects

LocalTown – Smart Town Community Platform | React.js, TypeScript, Node.js, Express.js, Prisma, MySQL, Tailwind CSS |

- Developed a full-stack community platform for rentals, marketplace, event management, and local services.
- Implemented JWT authentication, role-based access control (RBAC), REST APIs, and CRUD operations using Express.js, Prisma, and MySQL.
- Built responsive React interfaces with Tailwind CSS and integrated real-time notifications using Socket.IO.

HistoryGPT – AI History Assistant | React.js, TypeScript, Node.js, Express.js, Gemini API, Tailwind CSS | GitHub 2026

- Developed an AI-powered history assistant enabling interactive conversations with historical figures using Retrieval-Augmented Generation (RAG).
- Built a full-stack application with React, TypeScript, Node.js, and Express.js, integrating Google Gemini API for context-aware responses.
- Implemented document upload, vector-based retrieval, timeline generation, and secure REST APIs for an immersive learning experience.

AI Crisis Management System | Python, Flask, TensorFlow, YOLOv8, OpenCV, Docker | GitHub

2026

- Developed an AI-powered disaster monitoring platform integrating real-time weather analysis, computer vision, and deep learning for crisis management.
- Implemented YOLOv8-based infrastructure damage detection, TensorFlow MobileNetV2 image classification, and automated SMS alerts using external APIs.
- Containerized the application with Docker and designed a modular Flask backend following clean architecture principles.

Technical Skills

Programming Languages: Java, Python

Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap, Vite

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication

Databases & ORM: MySQL, MongoDB, Prisma ORM

AI/ML: Google Gemini API, OpenRouter API, AI Chatbot Development, Retrieval-Augmented Generation (RAG), TensorFlow, YOLOv8, OpenCV

Tools & Platforms: Git, GitHub, Docker, Postman, VS Code, IntelliJ IDEA, Eclipse, npm

Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS,

Certifications

- Infosys Springboard Full Stack Development
- NPTEL Certification
- Google AI Essentials
